EXPERIENCE

Feature 'The Sun Also Rises' dop: Carlos Buenaventura | Gaffer November 2021

I embraced the challenge of working on this low budget feature, having to work under pressure in a fast-paced production with limited kit. I had to craft solutions to work towards the strong look of the film, constantly collaborating with the DP.

Short 'Satellites' dop: Ben Hardy | Gaffer September 2021

Creating a space film on a low budget is always going to be challenging. We shot our astronaut in a Welsh lead mine and then used sterile soft light to suggest the docking station and created the spaceship through self-built out of focus light-up buttons (out of foam core and gel cuts) that surround her and reflect in her helmet.

Short 'Warm Egg' dop: Samira Oberberg | Lighting Assistant July/August 2021

Shooting in Brighton's Rialto Theatre in a mostly 360° set meant lighting primarily from the top. I practised my skills working on ladders, rigging lights to scaffolding and wiring them through dimmers.

Short 'Tommy's - Who's Counting' dop: Thomas Hole | Lighting Trainee Aug. 2021

Working with excellent Gaffers was a great learning experience, especially working with higher calibre kit that I haven't got to operate before. I enjoyed making myself useful by preempting, managing the truck, preparing frames and setting up lights.
